The SmartSense System

SMART SENSE

BY DIGI

The SmartSense system solves significant challenges by protecting critical environments and unlocking efficiencies. Our solution combines wireless sensors with remote monitoring software and a digital checklist. Giving you actionable insights that drive safety, productivity, and regulatory compliance.

Wireless Sensors

Protect any piece of refrigeration equipment with SmartSense's wire-free sensors.

Alerts & Corrective Actions

Receive push notification anytime there is a problem. Empower your team with structured corrective actions.

SmartSense Platform

Leverage actionable insights and advanced analytics to remotely monitor equipment, eliminate product loss, and optimize your workforce.

The SmartSense Difference

Deploys in Minutes

Install in minutes with self-provisioning wire-free sensors. Quickly monitor temperature, humidity, fixed, and mobile assets.

Enterprise Grade

Store & forward technology for lossless monitoring, up to 5-year battery life, IP67 rated sensors, and AES encryption and certificates.

Proactive Insights

Gain visibility with predictive models and simulated product temperatures that enable proactive decision making.

Compliance Visibility & Efficiency

Meet FDA, USDA, and FSMA requirements. Gain visibility into site performance for improved accountability and risk management.

Collaborative Monitoring

Drive efficiency with SmartSense's collaborative system for incident management and cross-team workflows.

Deployment Experience

We partner with our customers to create world leading systems. We have experience deploying 250 sites per day.

NIST

Options Available

Wireless Sensors

SmartSense sensors offer a 100% wire-free installation that eliminates drilling and provides simple, self-provisioning deployments.

100% Wire-Free: Deploy in minutes with the industry's only sensor that can be placed directly in fridges and freezers - no wires or cords.

Long Battery Life: Sealed NSF enclosures and user-replaceable battery options provide up to five years of worry-free operation.

Plug & Play Install: Sensors automatically connect to your SmartSense gateway to provide a self-provisioning installation process. Centralized configuration is provided through our web-based dashboard.

Cellular Gateway

The SmartSense BZ gateway provides a secure and effortless connection to the internet for your sensor network. No IT support required.

Flexible Connectivity: Up to 32 SmartSense Z Sensors and over 200 SmartSense B2 Sensors can be connected to a single BZ Gateway.

Store & Forward: In the event of power loss or connectivity interruption, our battery-backed gateway will store sensor readings internally until connection or power is reestablished.

SmartSense Dashboard

SmartSense's cloud-based dashboard provides real-time oversight of your safety initiatives and visibility into compliance, site performance, and risks.

Proactive Insights

Make proactive decisions using SmartSense's patented product simulation that provides insight into actual product temperature as well as ambient temperature.

Team-Based Monitoring

Assign tasks to teammates and track corrective actions from anywhere with SmartSense's collaborative approach to incident and workflow management.

Automate Reports

Receive automated reports by email to replace paper temperature logs and gain insight into chronically failing fridges to identify sites that have the greatest safety risk.

Visibility & Accountability

Gain visibility into your compliance checks and easily measure and compare site performance. Increase accountability with timestamps and signatures.

Prioritize by Severity

Manage Workflow

Actionable Context

Manage by Asset

Digital Task Management

All paper-based procedures can be digitized for better safety, compliance, and efficiency. Benefiting your team with consistent, time-bound checklists, guided, custom workflows, and corrective actions when there is a problem. Eliminating the guesswork from your SOPs.

Visibility & Insights

Gain real-time insights into checklist compliance and easily compare site performance. Quickly identify at-risk sites for immediate remediation.

Improve Accountability

Manual processes can be falsified, and increase the likelihood of inaccurate data. SmartSense solutions provide confidence and peace of mind that logged data is trustworthy

Task Management

Remotely publish and manage checklists for food safety, quality control, receiving, promotions, and more. Easily customize checklists and instantly push to all your sites.

Automate Reports

Schedule automatic or on-demand reports to replace paper logs and checklists. 2-year historical data log eliminates the need for extensive paper records.

Scheduled Checklists

Ensure all of your logs are completed in defined time windows.

Flow of Food

Monitor every step from delivery, cooking, to the sales floor.

Cool Down Logs

Ensure that cooked items are cooling at the right intervals.

Quick Actions

Non-scheduled tasks that must be available to your team throughout the day.

SmartSense Probe

The SmartSense Probe provides industry leading reading speed and intuitive feedback for improving productivity.

Lighting Effects: Programmable lighting effects in the probe handle provide intuitive feedback to operators on whether food is in or out of range.

Fast Reading: Maximize process efficiency with 0.5 second reading of the probe's precise T-type thermocouple.

Long Battery Life: Easily replaceable AA batteries provide a year of daily operation without the need to recharge or change batteries.

NIST Certified Probes

NIST certified probes offer additional monitoring capabilities and easy re-calibration services to ensure that temperature readings are accurately recorded.

Additional Monitoring: Monitor down to -200°C , humidity levels, and utilize glycol product simulation for actual product temperature.

NIST Certified: Guarantees precise data collection and ensures consistent readings over time.

Meet Regulatory Requirements: Meets specific legal requirements from regulatory agencies that call for strict and accredited calibration standards.

NIST

About SmartSense

SmartSense transforms how organizations sense, monitor, and make decisions. Using the Internet of Things (IoT), SmartSense changes the way organizations approach compliance, quality, and efficiency.

SmartSense automates monitoring for food safety, pharmacy safety, product quality, and preventative equipment maintenance. Today, SmartSense has earned the trust of the most critical government, commercial, and non-profit institutions in the world. Our systems enable real-time sensor-driven decisions at more than 80,000 sites.
