SmartSense VOYAGE

In-transit environmental monitoring for medication shipments

Ensure the security, safety, quality, and compliance of medications and vaccines as they move across each touchpoint of the supply chain.

Tackle the Challenge of Good Distribution Practice in Modern Cold Chains

With a long list of premiere customers, SmartSense has proven itself as the leading solution provider of condition monitoring, prescriptive workflows, and alerting with corrective actions for fixed refrigeration and freezer assets. SmartSense Voyage is an evolution of the organization's enterprise solution, offering new capabilities for protecting critical assets in motion from route deviation and cargo theft to ensure product integrity, medication efficacy, patient safety, and revenue maximization.

NACDS

2024 Best Pharmacy Operations Product

Protect Your Critical Medication Shipments in Motion

DISTRIBUTION QUALITY
Gain trustworthy evidence that product integrity was maintained through distribution. Enable faster, defensible action when it wasn't.

SUPPLY CHAIN
Track the location and condition of your shipments between each touchpoint with pin-point accuracy

PRODUCT SAFETY
Ensure safe medications and vaccines for patients while maintaining compliance with regulatory requirements.

INFORMATION TECHNOLOGY
Locate high-value assets when they are removed from your business

LOSS PREVENTION
Reduce unexpected product write-downs from route deviations and unscheduled stops or door openings

Designed to be Integrated or Stand-Alone

Created with flexibility for the customer in mind, SmartSense Voyage can be seamlessly integrated with your existing SmartSense solution or other enterprise cold chain monitoring systems for increased visibility and control across your distribution networks. As a fully functional solution on its own, SmartSense Voyage brings unique value for operations, supply chain, quality and safety, IT, and loss prevention use cases.

Dimensions:
55.4mm x 89mm x 11mm

FUELED BY THE FEATURE-PACKED T1 SENSOR

Powerfully small. State-of-the-art design.

The SmartSense T1 Sensor is a low-profile environmental sensor & data collector designed for applications that require portable and temporary monitoring. SmartSense T1 Sensors collect temperature and location information and upload the data to the SmartSense application via a common cellular connection.

- Flexible interval configuration
- End-to-end data encryption
- Precise GNSS location services (with fallback to cellular location)
- Low-profile form factor
- Store-and-forward
- LTE-M cellular communication
- International multi-carrier support
- Rechargeable via USB
