

SMARTSENSE ONE GUARD

Prevent Inventory Loss & Mitigate Risk

Automate compliance and ensure your warehouse is protecting the condition of stored inventory.

Digital HACCP Workflows

Create digital, time-based workflows for multi-step processes required for corrective action.

Data Capture & Execution

Expansive solution provides step-by-step guidance and photo and note capture for confirmed execution.

Compliance & Verification

Generate fully traceable digital logs with user, time, and condition data—verifying readings meet defined requirements before process completion.

Oversight & Reporting

Easily reference and export historical reports with summaries of exceptions, corrective actions, and trend analysis.

SmartSense ONE

SmartSense ONE unifies the platform's capabilities within **multiple core modules** that are intentionally designed to work together, creating a more powerful, connected system.

Monitor

Real-time condition monitoring & understanding of asset health.

Service

Identify issues before failures, track assets, & capture work orders.

Operate

Checklists, tasks, & SOPs with real-time accountability.

Guard

Automate compliance & connect exceptions to tasks.

Assure

Digital audits, inspections, & follow-up actions.

Label

Smart label printing management for size and material variants.

Customer Success, Prioritized

"I think the biggest thing that we have seen since SmartSense was rolled out is just the consistency in our temperature monitoring. We know and understand our refrigeration systems better now than we did before, because with the continuous tracking we can see if there's historical events and know if maybe a compressor isn't running right or something isn't working and then we can put a corrective action in place to make that refrigeration system work as efficient as possible."

Jesse J. Gross, Senior Director of Facilities, East Coast Warehouse
