

SMARTSENSE ONE OPERATE

Enhance Performance & Facilitate Team Accountability

Leverage the power of prescriptive workflows and accuracy in employee guidance to mitigate supply chain risk and boost execution performance.

Lists

The Operate module provides digital checklists that facilitate proactive supply chain execution and straightforward SOP adherence.

Workflows

Configure and adapt operational workflows with flexible building blocks designed for site-level precision and enterprise-scale control.

Operations Management

Easily publish checklists for all operations functions with associated SOPs to empower supply chain teams with prescriptive guidance.

Automated Compliance Reporting

Track task completion rates and safety exceptions throughout the supply chain—filter by site and individual employee.

SmartSense ONE

SmartSense ONE unifies the platform's capabilities within **multiple core modules** that are intentionally designed to work together, creating a more powerful, connected system.

Monitor

Real-time condition monitoring & understanding of asset health.

Service

Identify issues before failures, track assets, & capture work orders.

Operate

Checklists, tasks, & SOPs with real-time accountability.

Guard

Automate compliance & connect exceptions to tasks.

Assure

Digital audits, inspections, & follow-up actions.

Label

Smart label printing management for size and material variants.

Customer Success, Prioritized

"I think the biggest thing that we have seen since SmartSense was rolled out is just the consistency in our temperature monitoring. We know and understand our refrigeration systems better now than we did before, because with the continuous tracking we can see if there's historical events and know if maybe a compressor isn't running right or something isn't working and then we can put a corrective action in place to make that refrigeration system work as efficient as possible."

Jesse J. Gross, Senior Director of Facilities, East Coast Warehouse
