

SmartSense Probe

Paperless Food Safety System

The SmartSense Probe is an NSF certified, wireless temperature probe that can be used for checking hot or cold food items for acceptable ranges. The probe works in conjunction with your food safety checklist running on any Bluetooth 4.0 enabled tablet or mobile phone.

How It Works

The SmartSense Probe is an innovative, high performing device that drastically reduces the time needed to manually record temperatures and eliminates the need for paper log reports. The probe is designed for intuitive operation and ease of use in a commercial environment. The probe offers industry leading response time for quick temperature readings and customizable lighting effects to provide visual feedback on food safety checks. The SmartSense Probe is enclosed in NSF grade plastic that is safe for food contact.

Specifications

Product SKU	TM-BFP150
Wireless	Bluetooth Low Energy
Dimensions	H: 1.25", W: 1.75", L: 8.8"
Sensor Accuracy	±1.0°C (±1.8°F)
Resolution	0.1°C
Sensor Range	-20°C to 100°C (-4°F to 212°F)
Environmental Rating	IP67
Probe Length	4.7" with tip tapered to 1/16"
Screen	Dot-matrix LCD with white color backlight. Autorotation (180°)
Light Effects	Customizable RGB light effects on handle
Power Source	2 replaceable AA batteries
Enclosure/Strap	NSF certified

* Actual communication distance will depend on RF environment
